11 Ways The Aidoc aiOS™ Helps Health Systems Realize Al's Value

Aidoc is setting the standard for how AI should be scaled in healthcare with the aiOS[™], the only unified platform for enterprise AI adoption. The aiOS[™] helps health systems mitigate the risks associated with large-scale technology shifts by serving as the full stack orchestration, monitoring and action platform for all your health systems' AI solutions.

All you need for enterprise Al in one place: the aiOS[™]

Standards:

A single platform for deploying and managing all AI solutions, overcomes issues with incompatible solutions from different vendors.

Integration:

Enterprise-grade connectivity to systems of record, eliminates duplicative integrations for each AI solution.

Workflow:

Uniform options, filters and settings for all solutions simplifies and streamlines workflows for clinicians.

Drift Mitigation:

Data drift mitigation processes ensure that AI solutions deployed on the platform continue to perform accurately over time.

Orchestration:

Patent-pending process allows multiple Al activities to run on a single virtual machine, reducing data center utilization and costs.

Security:

Best-in-class security standards provide peace of mind that all solutions deployed on the platform are secure.

Diagnostic Radiologist Application: Pulmonologist Primary Care Standardized output for **Provider** all AI solutions creates predictability, flexibility aidoc and uniformity for end users.

Patient Management:

Post-acute workflow allows health systems to monitor patients who need additional care beyond initial acute finding.

Network Effect:

Communication workflows allow health systems to extend the benefits of AI solutions to referral sites.

Interventionalist

Hematologist

Analytics:

Personalized support, actionable tools and data visualization to measure the impact of AI solutions against health system goals.

Scale Solutions:

Allows health systems to implement, integrate and support homegrown AI solutions.

Learn how the Aidoc aiOS[™] provides health systems with a comprehensive solution for deploying and managing AI solutions.
