

# The ROI of AI: Cultivate the AI Giving Tree

ROI measures vary by facility and should be driven by the overall objective of your AI strategy. An AI vendor will help you translate facility goals into areas where AI can add value. With an enterprise-wide system, the benefits are more robust than they would be with a single solution. The graphic below illustrates the facility goals (the branches) and how the AI Drivers act as the roots which empower the growth of said goals:

**Broader AI adoption at hospitals could lead to savings of 4% to 11% in annual spending.<sup>1</sup>**
