

AI Impact at Your Fingertips

Aidoc Analytics gives you the AI metrics that matter when and where you need them.

Aidoc Analytics empowers health systems with built-in, self-serve analytics that transform how leaders govern, evaluate and scale AI across the enterprise. With a seamless dashboard and continuous monitoring, you gain a transparent view into AI performance, adoption and clinical impact.

Enterprise-Ready and Embedded in aiOS™

Aidoc Analytics isn't a bolt-on tool. Rather, it's an enterprise-grade analytics solution specifically for clinical AI embedded in the aiOS™ platform, available at no additional cost.

Your Data, Your Insights

- Make data-driven AI governance decisions
- Proactively optimize clinical workflows
- Demonstrate value to stakeholders and leadership
- Maximize AI adoption and usage

"We tried to do this work internally, and it was extremely painful. This platform gave us what we needed without burning time and resources."

Fernando Collado-Mesa, MD, FSBI, Associate Vice Chair of AI Research and Ethical Use at the University of Miami Health System

"Being able to show the data to leadership and radiologists boosts confidence and helps embed AI into clinical practice."

Thiago Braga, MD, Assistant Professor of Clinical Radiology and Officer for Imaging Informatics at UM/JMH Radiology

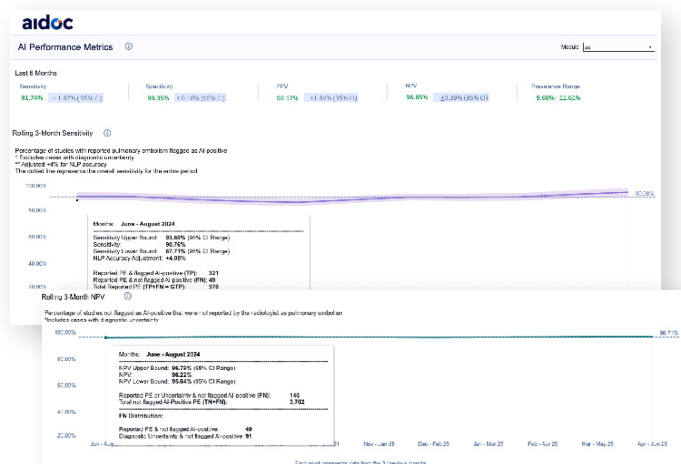

From Black Box to Proof Point

Aidoc Analytics brings full transparency to your clinical AI solutions.

AI Performance

Know how your algorithms are actually performing.

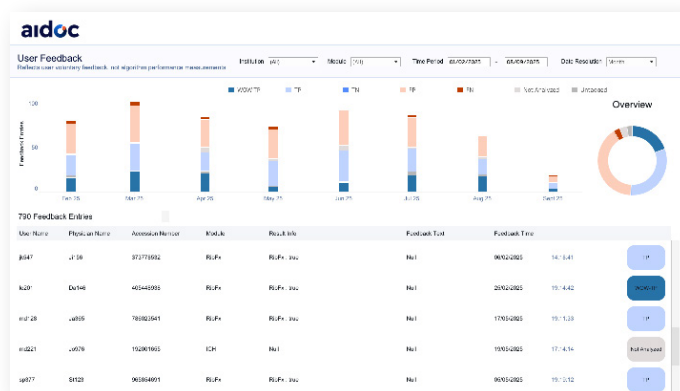

- Track algorithm performance with longitudinal metrics like sensitivity, specificity, PPV and prevalence
- Filter by site, algorithm, service line and timeframe

Feedback Metrics

Turn anecdotal feedback into action.

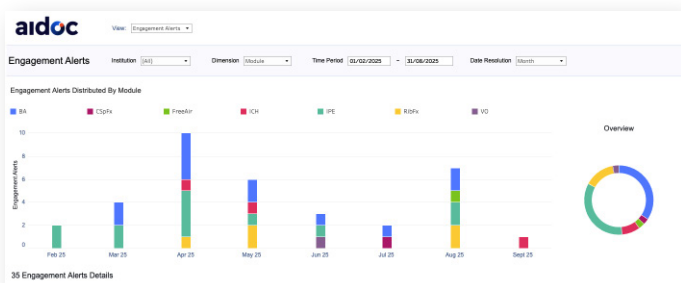

- Review feedback to spot potential training opportunities
- Compare individual feedback to trend data
- Identify highly-engaged users and champions to understand adoption and identify areas of low engagement to optimize

User Engagement and Alert Metrics

See who's using AI, how often and where to improve.

- Monitor study views, alert responses and user-level activity
- Identify super users and adoption gaps
- Target training based on real usage

Value Impact Metrics

Coming soon! Check downstream impact trends, such as incidental finding volume, to help measure value.

Connecting Health System Leaders with the Data They Need

Aidoc Analytics gives you the clarity to act, the data to prove value and the confidence to scale – all built into the aiOS™ platform you're already using.
